

Platinum Front Entry Doors

Our doors are built to look like timber doors without the associated maintenance. There is a standard range of doors which include traditional timber replicas to modern upmarket designs. These doors when used in conjunction with the range of colour, glass and lock styles can result in an elegant personalised entranceway.

Doors with solid panels or laminated glass and locks are solid and secure. There are many options for door locks, just as there are many options for glass.

To continue the energy efficiency options, a range of our Platinum Doors are designed with a thermal break and when used with double glazing, it creates the final touch in comfort.

Call our friendly team today

Whether you want to replace your cold, draughty windows or simply want to enhance the overall appearance of your home, call our Sales Team. New Aluminium frames and seal technology mean no draughts.

Double glazed windows improve heat efficiency and reduce noise.

Condensation is controlled with an exceptional water management system creating a healthier home.

Replacement Windows Story – Overview

Throughout the building industry Architects and Builders have long appreciated aluminium joinery for its overall strength, lasting value and ability to configure into some unique designs. As a Homeowner, are you sick of old paint peeling from your windows? Do your windows let winter warmth disappear from your living spaces? If so, **replacement windows** are one of the best investments you can make in your home. Apart from low maintenance, new aluminium joinery will also give a greatly improved street appeal. Windows and doors have an affect on how much energy a building uses, how warm or cold they are and how comfortable they are for the occupants. By using double glazing when replacing your joinery you can improve on heating and cooling costs and make yourself snug all year round. Our friendly and knowledgeable salespeople will help you select the aluminium windows and doors you need for your lifestyle and budget.

Windows like these are both unhealthy and inefficient creating a cold, damp house. The timber frames look tacky when the paint is peeling and in the long-term leads to rotting windows. Replacing your windows with Aluminium frames greatly reduces the ongoing maintenance.

● Water seeping into walls and leaking onto window ledges
● Rotten frames

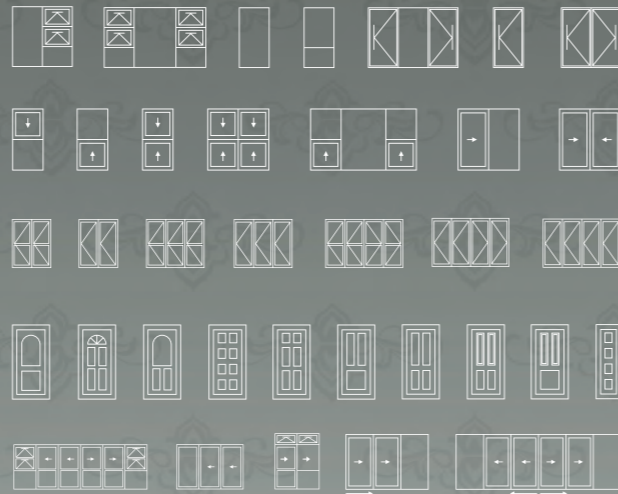

● Heat Loss ● Constant repainting

There is no need to repaint the frames - the Aluminium stays looking new for years and there is no rotting. Together with double glazing exterior noise is reduced, your home's efficiency is increased and condensation is controlled resulting in a healthy, warm, damp-free home.

Product Range

With proven classics to the latest trends, our product range can complement a large range of housing styles.

- ▶ **AWNING AND CASEMENT WINDOWS.** Fairview windows have strong frames, over and above minimum compliance codes, to withstand all seasons
- ▶ **SLIDING WINDOWS.** Perfect for restricted spaces, these windows bring light and air into your room.
- ▶ **BI-FOLD WINDOWS AND DOORS.** If you really want to let the sunshine in, Bi-Fold windows or doors are your ideal choice. These windows and doors open in a generous unobstructed way
- ▶ **FRONT ENTRY DOORS.** Our doors are solid, strong and substantial looking. They will not split, swell, warp or require repainting from sun, rain or age. They are also very secure.
- ▶ **SLIDING AND STACKER DOORS.** Both sliding and stacker doors are excellent to create indoor and outdoor flow.

Installation Process

We want you to feel really confident when choosing windows and doors for your home. Our experienced fabricators are ready to offer advice and support. The following photos show a brief step by step example of what to expect once you have decided to replace your windows. This is to ensure that you are aware of what happens in the process and do not come home to surprises.

STEP 1 Remove any pelmets, drapes and curtain tracks. Clear internal space below window for ease of installation.

STEP 2 The total window is removed from the house including the frames and glass leaving an opening where the old window used to be.

STEP 3 The installer can now start the process of installing the new windows in a watertight manner.

STEP 4 The new window or door frame has now been inserted with new architraves internally ready for painting. You can now appreciate a warmer, healthier house that has now increased in value with these new aluminium windows.

Resene EzyPaint

In partnership with Resene, we make it even easier and hassle free for you to see what your new windows and doors will look like once they have been installed before it even happens! This is done with Resene EzyPaint. Resene EzyPaint allows you to see the finish before you even start redecorating. No more worrying whether those two colours go together - you can now try them out for yourself. If they don't look right together, just keep trying other combinations until you create a scheme that is right for you. Resene EzyPaint is easy to use and our sales team will work with you to ensure that the colour that you are getting will be one that will match your house.
